

Daniel J. Gorham, P.E.

Education

M.S. Fire Protection Engineering, University of Maryland College Park, 2014

Thesis: Studying Wildfire Spread Using Stationary Burners

B.S. Fire Protection Engineering, University of Maryland College Park, 2012

A.A. General Studies, Community College of Baltimore County, 2010

Professional Experience

Research Engineer

July 2018 - Present

Insurance Institute for Business & Home Safety

Richburg, SC

Plan, conduct, and communicate research projects related to wildfire-hazards to the built environment. Conduct laboratory and field experiments on mitigation techniques from firebrands (embers) and other wildfire hazards. Communicate research findings and outcomes to insurance industry stakeholders and public.

Research Project Manager

October 2015 - June 2018

Fire Protection Research Foundation

Quincy, MA

Manage the technical and logistical conducting of research projects. Develop technical and financial support for Foundation projects. Facilitate research program planning in conjunction with Foundation stakeholders in order to develop research agendas and development of projects.

Associate Engineer

September 2014 - October 2015

National Fire Protection Association

Quincy, MA

Managed technical committee activities and projects throughout document development processing. Provided technical services to support the adoption and use of NFPA documents. Answered advisory service questions related to assigned standards.

Guest Researcher

June 2013 - August 2013

US Forest Service Missoula Fire Sciences Laboratory

Missoula, MT

Developed and performed experimental methods to study fire spread via flame intermittency. Assisted in performance of wind-tunnel fire spread experiments. Performed analytical and statistical analysis of experimental data. Contributed in the performance of additional large-scale experiments to study the intermittent heating from stationary fires.

Graduate Research Assistant

January 2013 - August 2014

University of Maryland, College Park

College Park, MD

Responsible for the technical and personnel management of multiple undergraduate research projects. Designed, developed, and used several experimental apparatus including a uniform-velocity wind blower for studying fire dynamics and multiple controlled heat release rate burners. Established safety protocols and operating procedures including fire safety considerations for multiple fire laboratories.

Laboratory Technician

October 2011 - January 2013

Fire Testing and Evaluation Center (FireTEC)

College Park, MD

Performed standard fire performance tests including: ASTM E1354, ASTM D92, ASTM E1321, ASTM E162. Designed, developed and performed custom fire performance testing (e.g. performance

evaluation of wood-frame fire blocker device). Maintained laboratory equipment database. Organized and managed laboratory maintenance (Lab Cleanup Day).

Certifications

Professional Fire Protection Engineer, California Certificate No. FP1943

Professional Associations

Society of Fire Protection Engineers, *Professional Member*

- Member, Committee on Professional Qualifications
- Member, Committee on Research, Tools and Methods

National Fire Protection Association

International Association of Fire Safety Science

- Member, Working Group on Large Outdoor Fires and the Built Environment

International Association of Wildland Fire

Experience

Massachusetts Wildland Fire Crew, *Firefighter Type 2, 2015 - 2018*

Boston Youth Wrestling, *Assistant Coach, 2014 - 2017*

Maryland Wildland Fire Crew, *Firefighter Type 2, 2009 - 2013*

Kingsville Volunteer Fire Company, *Firefighter/EMT, 2008 - 2013*

Skills

Project management

Research planning and communication

Small-scale and Large-scale fire experiments – planning, instrumenting, and implementing

Data collection, interpretation, analysis, and communication

Computational Fluid Dynamics simulations (Fire Dynamics Simulator)

Research Interests

Firefighter and emergency responder safety; Fire behavior and fire dynamics; Fire modeling/simulation; Wildland and wildland-urban fire spread; Data science & data visualization
