GET READY TO GO

If you anticipate evacuation orders due to wildfire, there are several things you can do to prepare your home before you leave.

Listen for updates closely and evacuate as soon as you’re told to do so.

SHUT OFF GAS

It’s standard practice by emergency response to shut off the gas supply to prevent feeding a fire. Doing so yourself reduces risks to your home or structure.

CLOSE DOORS

Closing doors and windows can prevent embers from entering the house or structure and igniting combustible materials, burning it down from the inside out.

TURN OFF AC

This will prevent outside smoke from entering the home and causing preventable damage.
